

Pratyush Kumar Shrivastav

Product Leader & Builder | Ex-Founder | Full-Stack Product Ownership

kumarpratyush239@gmail.com • <https://www.linkedin.com/in/f1pratyush> • <https://pm-pratyush.com>

Product leader with 9 years of taking zero-to-one ideas to shipped products - first as a startup founder who built full-stack infrastructure himself, then a founding product hire, and now driving product strategy for a consulting engagement spanning construction technology. Ramp into new industries fast: Edtech, Web3, health tech, construction, each a first-time domain, each taken from ambiguity to shipped product. Build AI-native systems and frameworks that turn ambiguous problems into fast, validated execution.

WORK EXPERIENCE

Product Manager - Utsuk Consulting May 2025 - Present

Early product hire driving AI-first product strategy, operating models, and new product incubation across industries including construction and health tech.

- Drove **200% account expansion** (1→3 resources across product, design, and engineering) by winning the client's full product and technology mandate from an underperforming incumbent vendor.
- **Created** Sonex, a **speech-to-intent SDK** enabling developers to **embed AI assistant** experiences into web and mobile applications in **< 30 minutes**.
- **Reduced** PoC delivery timelines by **~80%** and **revived** 2 dormant client opportunities by building **PROVE**, a hypothesis-to-MVP operating framework and AI agent suite.
- **Designed** an elderly-first health companion app, authoring a **UX Preamble** that rethinks mobile conventions built for digital-native users, integrating Apple HealthKit and Android Health Connect.
- Sole recipient of the **Utsuk Sculptor Award**, the company's annual honour for innovation and organisation-wide impact.

Founding Product Manager - PlayVerse Ventures July 2022 - February 2025

Founding PM for a multi-product venture studio - building products across Web3, fantasy gaming and marketplace platforms.

- Conducted **50+ customer interviews** with founders to shape FundsConnect's matching **algorithm**; separately drove **36 investor opt-ins** building the platform's supply side.
- **Launched** Billions Quest - a Web3 stock fantasy game, generating **\$15K** in transactions, growing a **4,000-member Discord** community, securing a **\$250K grant** from SKALE Network, and winning the gaming pitch event at India Blockchain Week 2024
- **Led** product development for DreamCric, building a performance-based player pricing engine and securing Razorpay's **payment gateway** approval through legal-counsel-guided **compliance** work in a then-ambiguous regulatory landscape.

Product Manager - ProBano (acquired by Toprankers) March 2019 - June 2022

Facilitated the **transition** of ProBano **from an offline** career-counselling service to an **online platform**

- **Enabled** the company to **generate ₹2cr+** in B2B sales with **psychometric test and report generation automation**
- **Automated** psychometric evaluation — replacing ~15-minute manual scoring with instant results, and capturing full 4-way ranked preference data versus the offline process's partial top-2 capture, **improving the quality** of career recommendations.
- **Impacted 25000+ students**, partnering with clients like **JK Lakshmi Cement, Honda, HCL, and Perfetti**
- Enabled **automated impact reporting** that helped win large enterprise clients, driving the growth that led to ProBano's **acquisition** by Toprankers - who continued running the platform post-acquisition.
- Led development of ProBano's web and mobile applications, and mentored 4 developers.

Founder & Chief Product Architect - Enrole August 2017 - Feb 2019

Founded Enrole, a **SaaS platform** for educators, personally building the product from the ground up.

- **Built** core infrastructure, web and mobile apps integrating **live streaming** and **automated payment settlements**
- **Enabled** educators to create online classrooms and set up payment collection **under 2 minutes**
- Personally **visited 100+ colleges** to pitch the platform and gather customer insight, onboarding **4 early adopters**.

CORE EXPERTISE

AI-Native Execution: AI agents, AI evals, speech-to-intent systems, AI-assisted discovery, workflow automation
Product: Zero-to-one product development, discovery frameworks, MVP scoping, rapid prototyping, product operating models
Technical: Full-stack architecture, Rails, React Native, Next.js, AWS, API/platform design, payment gateway integration
Domains: Edtech, Web3/gaming, construction tech, health tech, fintech-adjacent (payments/compliance)

EDUCATION

Indian Institute of Engineering Science and Technology - BE Civil Engineering August 2013 - May 2017

- **Founded** and served as **VP** for the institute's Entrepreneurship Development Cell, securing institutional recognition and budget.
- Recognized among the annual **Excellence Award** recipients by the alumni body for institute-wide initiative and impact.
